RE : LONG VALLEY DIST.

Gentlemen:

I am in receipt this day of your recommendation for the employment of Walter S. Carpenter of Glendale, Utah as Water Commissioner on Long Valley distribution for 1933. The enclosed letter to Mr. Carpenter is self-explanatory and is sent for your information.

Assuming that you have discussed this matter with Mr. Carpenter and the assignment is agreeable to him, I am sending you herewith a copy of your assessment roll for the years 1925 to 1932, inclusive. You will note delinquents in the amount of \$123.05 which, if the roll be correct, should be collected. If it be in error, it should be corrected to such extent. I am asking, therefore for the consideration of this entire matter that you call a meeting of your water users, selecting one man from each representative group and form an Adjudication Committee with a Secretary, this committee to be a permanent organization to stand between the water users and the State Engineer in all matters pertaining to assessments and collection s thereof, disbursements and controversies.

When you will have selected this committee, its first duty should be to go over the assessment roll and write off or reduce any delinquent assessments which are in error or excess, prepare a new roll and return it to this office for assessment purposes for the season 1933.

It might be interesting to you to know that the water users on the Virgin river between St. George and Hurricane

#2-Long Valley Dist. : 6/8/33

have perfected an organization as above outlined and instead of levying an additional assessment this year are undertaking to collect a sufficient amount from the delinquent assessments prior to 1933 as will pay the Water Commissioner and his expenses for 1933.

I suggest that some such arrangement be made in the Long Valley distribution.

Please perfect the organization referred to, send me the names of the members of your committee, put into effect the suggestions which I have offered and write me fully,

Yours very truly,

T.H. Humphrys,  
STATE ENGINEER
